Recycling and waste disposal policy.

At Bloomsburys we feel very passionately about how we deal with the waste that we all create.

We really hope you enjoy your stay with us and hope to remember your stay here at Bloomsburys by signing our visitors' guest book in the main restaurant on the day of your departure. But before you leave, we ask that you please deal with your waste in the following way:

There are three containers for your waste – General, food and glass.

Please ensure your general waste is placed in your large lidded bin. Please **DO NOT PUT ANY FOOD OR GLASS IN THIS BIN.**

Your glass bottles must be separated into the crate. Any bottles that you brought in and do not fit into the crate should be taken away by you when you leave (as outlined in our guidelines).

All cooked and processed food waste need to be separated and put in the small labeled lidded container we provide for us to recycle for you.

Please leave any unwanted food that is fit for human or animal consumption in the fridge or on the outside table. If possible we will redistribute the food products as ethically possible for you to help with sustainability and the environment

Your general rubbish and glass bottles once separated at camp must be brought up to the large general waste bins in the front car park leaving minimum evidence of your presence once you have gone to pastures new.

Thanks for your co operation – together we can really make a difference!
